

SWMS - Concrete Cutting on Bridge Deck

Scope: Wet-cut concrete saw operation on bridge deck section B over a 2-day period.

High Risk Construction Work: Use of powered abrasive saws within 4m of live traffic.

Work Activities:

1. Pre-start checks and toolbox talk
2. Mark cut lines with chalk and tape measure
3. Set up exclusion zone with barriers and witches hats
4. Wet-cut concrete saw operation
5. Cleanup of slurry and offcuts

Hazards:

- Cuts and lacerations from blade (high) -- guard, kill-switch, two-hand operation
- Silica dust inhalation (high) -- water suppression, P2 respirator, wind direction check
- Noise above 85dB (medium) -- class 5 earmuffs mandatory inside the exclusion zone
- Slip hazards from slurry (medium) -- sand bunding, mop-and-bucket, non-slip boots

Controls: blade guard (engineering), water suppression (engineering), exclusion zone (admin), spotter (admin)

PPE: hard hat, P2 respirator, class 5 earmuffs, safety glasses, hi-vis, gloves, steel-cap boots

Training: RIIWHS204 Working at heights, RIICCM201 concrete saw user.

Emergency: stop blade, isolate water, call 000, retreat upwind from any dust cloud.

Signed: J. Smith (foreman), 2026-06-29
