| M (2)<br><i>(Medium level of harm)</i> | Potential temporary disability or minor structural failure/damage. On-site environmental discharge/release contained, minor remediation required, short-term environmental harm.                  | M (2)<br><i>(Medium)</i> | 1                        | 2                    | 3                    |
| L (3)<br><i>(Low level of harm)</i>    | Incident that has the potential to cause persons to require first aid. On-site environmental discharge/release immediately contained, minor level clean up with no short-term environmental harm. | L (3)<br><i>(Low)</i>    | 2                        | 3                    | 3                    |
| Level                                  | Likelihood / Probability                                                                                                                                                                          |                          |                          |                      |                      |
| Likely                                 | Could happen frequently                                                                                                                                                                           |                          |                          |                      |                      |
| Moderate                               | Could happen occasionally                                                                                                                                                                         |                          |                          |                      |                      |
| Unlikely                               | May occur only in exceptional circumstances                                                                                                                                                       |                          |                          |                      |                      |

**HIERARCHY OF RISK CONTROL**

The hierarchy of controls must be applied in the order below for all identified hazards.

|                                                                                                           |
|-----------------------------------------------------------------------------------------------------------|
| <b>Level 1</b><br>Eliminate the hazard                                                                    |
| <b>Level 2</b><br>Substitute the hazard with something safer.                                             |
| <b>Level 3</b><br>Isolate the hazard from people.<br>Reduce the risks through engineering controls.       |
| <b>Level 4</b><br>Reduce exposure to the hazard using administrative actions.                             |
| <b>Level 5</b><br>Use personal protective equipment                                                       |
| The control measures that you put in place should be reviewed regularly to make sure they work as planned |

**ACTIVITY ANALYSIS**

| Steps in Activity                                | Potential Hazards                                                                                                                                                | Risk Class | Risk Control Measure                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Responsible Person/s                | Risk Class After Controls in place |
|--------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|------------------------------------|
| <b>Pre planning</b>                              | Untrained persons<br>No Communication<br>Unsafe working conditions<br>Working alone - increased likelihood of incident.<br>Operation of motor boats.<br>Drowning | <b>1</b>   | <ol style="list-style-type: none"> <li>1. No person shall travel and work in remote areas unless they are competent in the work to be performed and do not have any current health issues that may cause a concern. (if a person has any medical condition which may require medication e.g. asthma, heart condition, is susceptible to fits or any other condition which may be unsuitable for bush walking).</li> <li>2. It is the responsibility of all workers to inform their Supervisor prior to leaving for a remote location of any medical health issues they have.</li> <li>3. The primary form of communication in isolated &amp; remote areas is the Satellite phone- Supervisor to ensure all persons in the work crew understand how to use the satellite phone in an emergency situation.</li> <li>4. No person shall work alone in isolated &amp; remote areas.</li> <li>5. Supervisor phones in at the start of work, and at the end of the shift (and at other times as deemed necessary due to working conditions) to base noting day's work activities, location and welfare of all workers.</li> <li>6. Only trained and competent operators with a boat licence operate motor boats refer SWMS-Aluminium Boat - Safe Working From.</li> <li>7. Boat operators and passengers must be competent swimmers and use life jackets in areas deemed necessary e.g. fast flowing water or deep water.</li> <li>8. Train all site personnel in emergency procedures and ensure that an appropriately stocked first aid kit is available on site.</li> <li>9. A first aid person with Cardio-Pulmonary Resuscitation (CPR) training is to be available on site where there is a risk of drowning to workers.</li> </ol> | Management<br>Supervisor<br>Workers | <b>2</b>                           |
| <b>Driving and unfamiliar driving conditions</b> | Vehicle crashes<br>Vehicle breakdown<br>Personal injury or death                                                                                                 | <b>1</b>   | <ol style="list-style-type: none"> <li>1. No person should drive or operate vehicles or equipment unless they are licensed and have been competently trained to do so including the driving of 4WD vehicles.</li> <li>2. No person shall operate plant or equipment under the influence of alcohol, illicit drugs or prescription drugs that affect their ability to work safely.</li> <li>3. **Implementation, Monitoring and Review of SWMS**

The Supervisor on site has the responsibility to:

- Brief each team member on this SWMS before commencing work.
- Ensure control measures have been implemented prior to the start of works.
- Observe work being carried out.
- If controls documented in SWMS are not adequate, stop the work, review the SWMS, adjust as required and re-brief the team.
- Ensure team knows that work is to immediately stop if the SWMS is not being followed.
- Retain this SWMS on site for the duration of the high-risk construction work.
- All persons involved in these particular tasks on site must sign this document as read and understood.

**SWMS attendance sheet — I have been given the opportunity to provide input into the development and review of this SWMS**

| Name (please print clearly) | Signature | Company | Date |
|-----------------------------|-----------|---------|------|
|                             |           |         |      |
|                             |           |         |      |
|                             |           |         |      |
|                             |           |         |      |
|                             |           |         |      |
|                             |           |         |      |
|                             |           |         |      |
|                             |           |         |      |
|                             |           |         |      |
|                             |           |         |      |

**Daily pre-start meetings will be held to ensure all workers are informed of control measures and additional safety hazards & controls to be noted on toolbox form.**
